

Models

The smoking cabin is available in four different models. Each model can be extended with options such as a lean-to support, footrest or poster display for (company) information or marketing purposes. Our range of innovative tobacco applications does not consist of smoking cabins only. We also offer air cleaners, smoking tables and ashtrays to set up a professional smoking room.

Your authorised Euromate distributor:

Euromate enables people to breathe pure air. For the improvement of indoor air quality we offer high-quality, contemporary products that effectively remove a broad range of pollutants. Years of experience, expertise and service orientation allow us to provide effective air cleaning solutions to our (international) customers.

EUROMATE OFFERS ALL-IN SOLUTIONS FOR AIR CLEANING

Euromate has over 40 years of experience in the field of air cleaning. This provides in-depth knowledge of indoor air and removal of air pollutants.

For optimal use of the air cleaner regular maintenance by a professional is recommended. A service contract can be agreed with our sales organization. There are various maintenance agree-

ments possible, depending on the filter choice and the degree of air pollution.

SMOKE'N GO SMOKING CABINS

Create a pleasant environment for both smokers and non-smokers

A space where both smokers and non-smokers are together, it is possible!

Euromate offers a complete line of smoking cabins designed to assist in the removal of unwanted tobacco smoke and unpleasant odours: Smoke 'n Go. Create an environment in which both smokers and non-smokers can work in harmony. Euromate offers the perfect solution.

Smoking cabins

The freestanding, modular smoking cabin can be installed everywhere. Inside your office, in a corridor, near the coffee corner or in a public area. Thanks to its unique filtration system the cabin not only removes tobacco smoke, it also improves the overall indoor air quality, as the clean air is recirculated.

The smoking cabin purifies air efficiently and practically noiseless. The push-pull system in the roof of the cabin optimises the airflow and assures that smoke does not linger.

The odourless ashtray has a capacity of several thousands of cigarette butts. Still-burning cigarette and cigar butts disappear without a trace of smoke or annoying smells. This also enhances the fire safety in your company.

The automatic start/stop system ensures that air cleaning only takes place when someone is actually using the cabin, therefore you are saving energy.

Filter
99,9%

tobacco smoke from the air

The smoking cabin is available in

4

different models

Always a **suitable** solution

The smoking cabin is available in various sizes and models. From Compact models for smaller locations to Plaza units for large designated smoking areas. To meet your specific requirements you can expand the smoking cabin with various options. The cabins can be placed at strategic locations, optimising the traffic flow within your building.

Elegant design

The smoking cabins blend in perfectly with virtually any environment thanks to their stylish and elegant design. The transparent walls are made of safety glass. It creates a pleasant open feeling for smokers, so they do not feel left out.

Efficient and cost-saving

Those in need of a quick cigarette break do not need to go outside; instead they can stay near their workplace. It does not only save time, the costs per smoker are also lowered. Thanks to its compact design, the smoking cabin hardly takes up any expensive floor space.

Your benefit

Staff can remain in the vicinity of their workplace during their cigarette break, which promotes a good atmosphere at work and increases productivity. An innovative appliance, such as the smoking cabin, benefits a good smoking policy. It strengthens your company image, demonstrating that you take all your staff, smokers and non-smokers, seriously. The smoking cabins of Euromate have been tested exhaustively and are certified by the European ECN, German TÜV and BGIA institute on safety and efficiency.
