Indoor
Air Purifier

Air Touch™ X
The smartest way
to keep pollution in check.

Indoor Air Pollution Can Be Up To 10 Times Worse Than Outside*

Large open spaces have many hard-to-reach spots such as attics, crawlspaces & wall cavities which enable potential pollutants to build up more, affecting the overall air quality level. What's even more surprising is that many of them are not even visible to the naked eye and can cause severe respiratory illnesses and breathing disorders.

Triggers of Indoor Air Pollution

Dust Cooking Furnishing Cleaning Agents Pets

Impacts On Human Health

Frequent Headaches Asthma Attacks Increased Allergy Respiratory Complication

Honeywell Air Purifier cleanses indoor air by removing pollutants such as PM2.5, dust, pollen, smoke, bacteria, virus, mould and other toxic gases, thus creating a healthy environment for you and your loved ones.
